PolyFoam Safety Panels

Product Application:	Playgrounds, Recreation, Sports & Fitness
Dimensions:	4' x 6' x 3/4" up to 2 1/8"
Density:	Light, Medium, High
Optional:	Machine Grooved Drainage Channels
Warranty:	8-Year Manufacturer's Warranty
Testing:	Meets ASTM 1292 & ADA Compliance

PolyFoam panels are made from 100% recycled, non-contaminated post industrial cross link closed-cell polyethylene foam. This environmentally friendly safety and drainage pad is 100% recyclable.

Depending on local soil conditions, PolyFoam pads can be used as a partial or total replacement of crushed stone beneath turf. This saves you time and money, while making installation considerably faster than standard stone surfaces. PolyFoam panels have the best cost/benefit ratio of any drainage/shock attenuation pad on the market today.

The PolyFoam panel is highly elastic and retains its great shock absorption characteristics for many years. It will provide your playground years of consistent safe 1292-04 HIC and GMAX Ratings. Testing is available upon request.

You will have many more hours & days of benefit from your playground because of how efficiently the PolyFoam pad drains water. Many times, your kids can be right back out playing within 15-20 minutes after a rainfall. PolyFoam pad will drain over 36* gallons per square foot vertically and up to 7.25* gallons per hour horizontally. The pad is ideal for use beneath both commercial and residential synthetic turf systems.
