

Our Guarantee

Buy with confidence knowing PolyFoam Sports Field Pads are backed by our 8 Year Warranty with a 2-3 turf cycle life expectancy. We warrant against, cracking, shattering, or deteriorating under normal and proper use, and that the panels will not compress by more than fifteen percent as long as they are not subjected to stress loads in excess of those that ordinarily occur during use for athletic performance.

Serious Protection for Serious Players

The PolyFoam Advantage

Greener. The PolyFoam Sports Field Pad is made from 100% recycled, non-contaminated post industrial cross link closed-cell polyethylene foam. This environmentally friendly product is 100% recyclable, completely free of rubber as well as lead and heavy metal free.

Easier and More Economical. Depending on local soil conditions, PolyFoam Sports Field pad can be used as a partial or total replacement of crushed stone beneath turf. This saves you time and money, while making installation considerably faster than standard stone surfaces. PolyFoam pad has the best cost/benefit ratio of any drainage/shock attenuation pad on the market today.

Drier. Your team can get back on the field shortly after a rain as our highly porous material does not absorb water or other liquids and the cross-linked foam underneath synthetic turf increases both vertical and lateral drainage. PolyFoam pad will drain over 36* gallons per square foot per minute vertically and up to 7.25* gallons per hour horizontally. The pad is ideal for use beneath commercial and residential synthetic turf systems.

Healthier. The antibacterial qualities of PolyFoam inhibit bacteria and fungus growth. This is particularly important with the recent rise of staph infections. The pad will not compact, keeping a more even surface than stone which can cause twisted ankles and other injuries.

Safer. PolyFoam Sports Field Pad is highly elastic and retains its great shock absorption characteristics for many years. GMAX* ratings of under 100 are easily attainable depending on the thickness of the pad used. Fields with PolyFoam pad will maintain consistent GMAX* ratings over the life of the field.

Machined Drain Channels

Available Configurations

	1/2" Thick	3/4" Thick	1" Thick
Rolls, 4' W x up to 275' L	x	x	x
4' x 6' Sheets	x	x	x
4' x 6' Puzzle Cut Sheets		x	x

Puzzle Cut Sheet

Machined drainage channels available on 3/4" and 1" thick pad. *Test results available upon request.
