## Making America Greener One State at a Time®

PolyTurf is committed to developing environmentally sound products. We provide the alternative to create the look and feel of natural grass without the need for water or chemicals.

It is our mission to continue to develop an attractive, cost-effective and environmentally friendly alternative to natural grass that is long lasting. We offer a 10-year manufacturer's warranty and guarantee to either meet or beat any competitor's turf estimate.

PolyTurf is a division of United Sports Surfacing of America, Inc.

## Synthetic Grass Innovations from Start to Finish

# Offering the Complete

## Both Beautiful and Functional

PolyTurf® products are engineered to exceed expectations with unmatched beauty and functionality. As an environmentally friendly, esthetically pleasing, soft to the touch, and long-lasting synthetic grass, PolyTurf offers a new approach to innovative landscaping.

It looks and feels like natural ground cover, but has proven to be a cost effective, water saving, and virtually maintenance free alternative.

Whether you install PolyTurf or we do it for you, the process is easy and guaranteed to offer many years of trouble free, useful and attractive service. With a 10-year warranty, you are sure to enjoy your lawn for years to come.

# COMMERCIAL

## Municipal Landscaping

Conservation is a key focus for today's urban developments. Often found curbside, on medians, in front of commercial buildings, and also in parks, PolyTurf's permeable LEED rated products allow municipalities to decrease water usage, manpower, and storm water runoff, saving money and the environment 365-days a year.

## Green Rooftops

Green grass can be your view from the highest building! PolyTurf offers innovation in design for enabling rooftop gardens where grass is difficult to grow. With a year round, well cared for look, PolyTurf resembles natural grass in its' best condition.

## Props for Events, Displays & Themes

Create an outdoor setting indoors! Smaller pieces of turf can fit into any uniquely designed space. Lightweight and portable to be taken from one place to the next, PolyTurf can be reused over and over again!

# RESIDENTIAL

## Landscape

It's home — so make the surrounding lawn lush and inviting year round. Replacing your run down sod with PolyTurf will reduce annual maintenance bills and give individuals more time to play — instead of work — in the yard. Several cost-effective options are available for creating the perfect lawn.

## Poolside

Synthetic turf is a clean choice for enhancing poolside lounging. Our non-infill system is ideal around pools as it is a no-mess solution that does not shed dirt, pollen, or plants into the water and filters.

## Pet Perfect

Keep your lawn looking freshly cut, despite lovable pets, with PolyTurf's "Pet Perfect" products. Provide the look and feel of a natural grass, minus the wear and tear associated with pet waste and traffic. As always, our products are lead-free, non-toxic, and safe. Cleaning is quick and effective with the PolyTurf Refresh enzymatic turf cleaner and odor neutralizer. Our grasses do not house fleas or ticks and that's healthy for everyone.

## Heat Reducing Technology

Whether your turf is installed by your pool, children's play area, or for your pets, Cool Reflect products will reduce heat absorption up to 30 degrees, making thermal discomfort less likely.

Whether you're interested in well-manicured lawns or playing sports, PolyTurf products can be designed and professionally installed to suit your needs with ease and innovation.

# PARKS & RECREATION

## Sports and Fitness

Athletes and fitness gurus can appreciate the high performance capabilities that PolyTurf provides. Shock absorbing footing combined with traction and release characteristics makes PolyTurf ideal for soccer, football, lacrosse, and batting cages. Customized systems are available for specialty sports like Crossfit and agility training in gyms.

## Parks & Playgrounds

PolyTurf's allergen free alternative provides the look and feel of real grass. It makes playing fun and safe for families, while cutting down on water and maintenance fees for schools, cities, and homeowner associations. PolyTurf incorporates an anti-microbial layer for additional protection.
