

Setting New Standards for Sustainable Sports Surfacing with Mini Pitch Fields

Green System Advantages

- ✓ Great for Storm Water Drainage
- ✓ No Heavy Metal Leaching
- ✓ End-of-Life Recycling Solutions

Safety Value

- ✓ Guaranteed Shock Absorption Throughout the Useful Life
- ✓ Increased Player Protection
- ✓ Uniform Play Conditions at all Times

The Next Community Grass Roots Movement

PolyTurf's development team set a new standard with the installation of a PolyTurf Champion Sport "Green" field. This technological advancement provides the optimum choice for a multi-purpose, two layer, non infill system which includes a resilient porous rubber pavement base layer, creating less maintenance, a full life cycle management program, and a safer playing environment.

Champion Sport with Cool Reflect Technology

Featuring a Synthetic Cool Reflect Fiber with a Solar Reflectance Index (SRI) Value of 33, lowering surface temperatures by up to 20 degrees

Rubberway Pervious Pavement Underlayment

In-situ porous, recycled rubber pavement layer eliminates the need for loose rubber infill, diverts tires from local landfills, and meets G-max 99

Providing Vertical Integration through Design, Development, Installation, and Manufacturing
